

CONTINUOUS RAFTER ROLL

PRODUCT: CONTINUOUS RAFTER ROLL

PRODUCT CODE: RAFT300 (300mm width)
 RAFT400 (400mm width)
 RAFT600 (600mm width)
 RAFT800 (800mm width)

PURPOSE: Rafter Roll is designed for use in warm roofs where the roof is insulated at rafter level. The roll prevents the loft insulation from being pushed up against the underside of the roofing felt, which can lead to condensation in the roof space.

The installer should select the size of tray to ensure it will fully restrain the thickness of insulation underneath.

It is structurally profiled with a large transverse of 'corrugation' to prevent air gaps from being closed off, allowing a full 25mm air path is guaranteed.

- Designed to fit the 4 common rafter centres of 300, 400, 600 and 800mm
- Suitable for roof pitches 15° or greater
- Flexible, quick and easy to install
- Suitable for new builds and refurbishment projects
- Highly durable light weight rolls

COLOUR: Black

MATERIAL: PVC

ROLL THICKNESS: 1.8mm - 2.2mm

LENGTH: 6m Roll

WIDTH: Available in 300mm, 400mm, 600mm & 800mm

INSTALLATION: See Rafter Roll Installation Guide

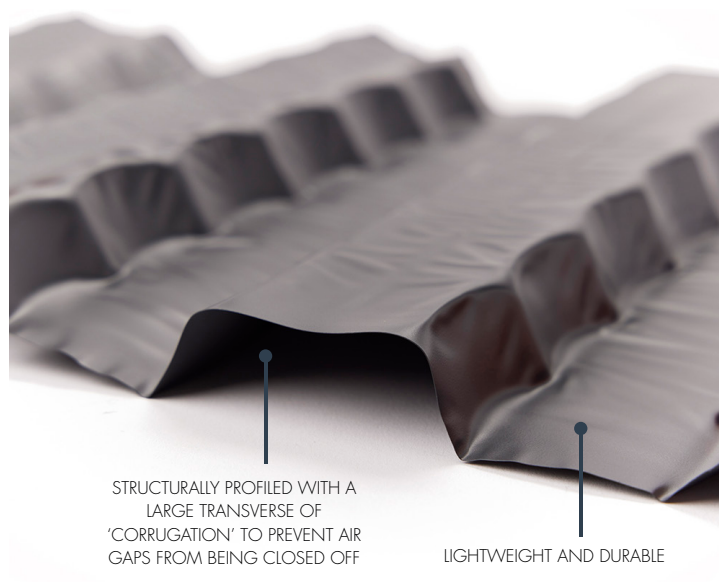

BOX QTY: 10

PALLET QTY: 180
