Well made in Britain

For more than 50 years, we've proudly been the UK's leading manufacturer and distributor of high-quality wooden garden products. As a British company, we are proud to be using sustainable, British timber. Our products are widely available online and in over 3,000 retail stores across the country.

With outstanding customer service at our core and an industry-leading distribution network, we ensure our products are delivered efficiently to homes throughout the UK.

Forest Garden is also proud to have received the inaugural King's Award for Enterprise in Innovation - the most prestigious accolade for UK businesses. This recognition celebrates our ground breaking achievement in developing the world's first fully automated, high-speed fence panel manufacturing process.

Beautifully built

If you'd rather take a back seat when it comes to building, don't worry. Our Assembly Service, available on selected products, means your new purchase is in safe hands and you can leave all the hard work and heavy lifting to us.

Installed items are indicated with IN after the product code.

Helping everyone thrive

We like to do our bit for charity. None more so than Thrive, which uses gardening as therapy to bring about positive changes in the lives of people living with disabilities or ill health, or those who are isolated, disadvantaged or vulnerable. thrive.org.uk

White Glove Delivery by forest

You choose a convenient day for delivery

You will receive a 4 hour time slot, 2 days before delivery

You will receive a 2 hour ETA on the morning of the delivery with a link to track the driver

Our own friendly drivers will deliver the product straight into your garden

We will remove all your packaging

We are Carbon Neutral!

We are very excited and proud to be a carbon neutral business.

At Forest Garden, we believe in minimising our impact on the environment. So, we work with Carbon Neutral Britain™, the UK's leading carbon offsetting provider, to offset our environmental impact.

We do this by funding projects that remove CO₂ from the atmosphere to balance out our own emissions, helping us to become carbon neutral.

Building a green future

We believe that a successful business is also a responsible business. This includes playing our part in protecting the environment and making sustainable choices.

Electric vehicles

Where we can, we use only full electric or hybrid vehicles in our own company car fleet. The take-up of electric or low-emission vehicles is something we're proud of supporting in other ways too, such as the installation of multiple electric vehicle charging points at all of our operational sites.

Our aim is to complete the conversion of all of our company fleet of forklift trucks to electric, wherever it is practically possible.

Lighting

We've reduced our carbon footprint by transitioning all our lighting systems to highly efficient LED systems. As a result of our £400,000 investment, our lighting now uses 57% less energy than it used to.

Paper

As part of our commitment to sustainability, we use carbon balanced paper. This initiative is run by the World Land Trust and endorsed by Sir David Attenborough. The paper we buy from their approved suppliers is balanced with donations to the Trust, who use the money to create essential nature and wildlife reserves worldwide. So far, protected habitats have been created in over 20 countries.

Replanting

We are part of the process that locks carbon in for over 40 years through the replanting of harvested forests.

We are currently working towards net zero 2050. Please see our website for the most up to date information.

Sustainable Timber

Timber is at the very heart of our business. As a natural product it blends seamlessly into your garden and will last for many, many years. We're proud to say that the majority of the timber we use is cut in our very own sawmill, from trees grown in the UK. We are proud as a business to hold two timber certifications, FSC® and PEFC®, that are regularly audited internally and independently. FSC®-certified products available on request.

These certifications are critical to the business to ensure we remain compliant with current requirements, our values and to demonstrate to our customers our commitment to protecting our forests and wildlife. This means that our timber comes from sustainable, responsibly managed forests and other controlled sources, helping to sustain our forests for future generations.

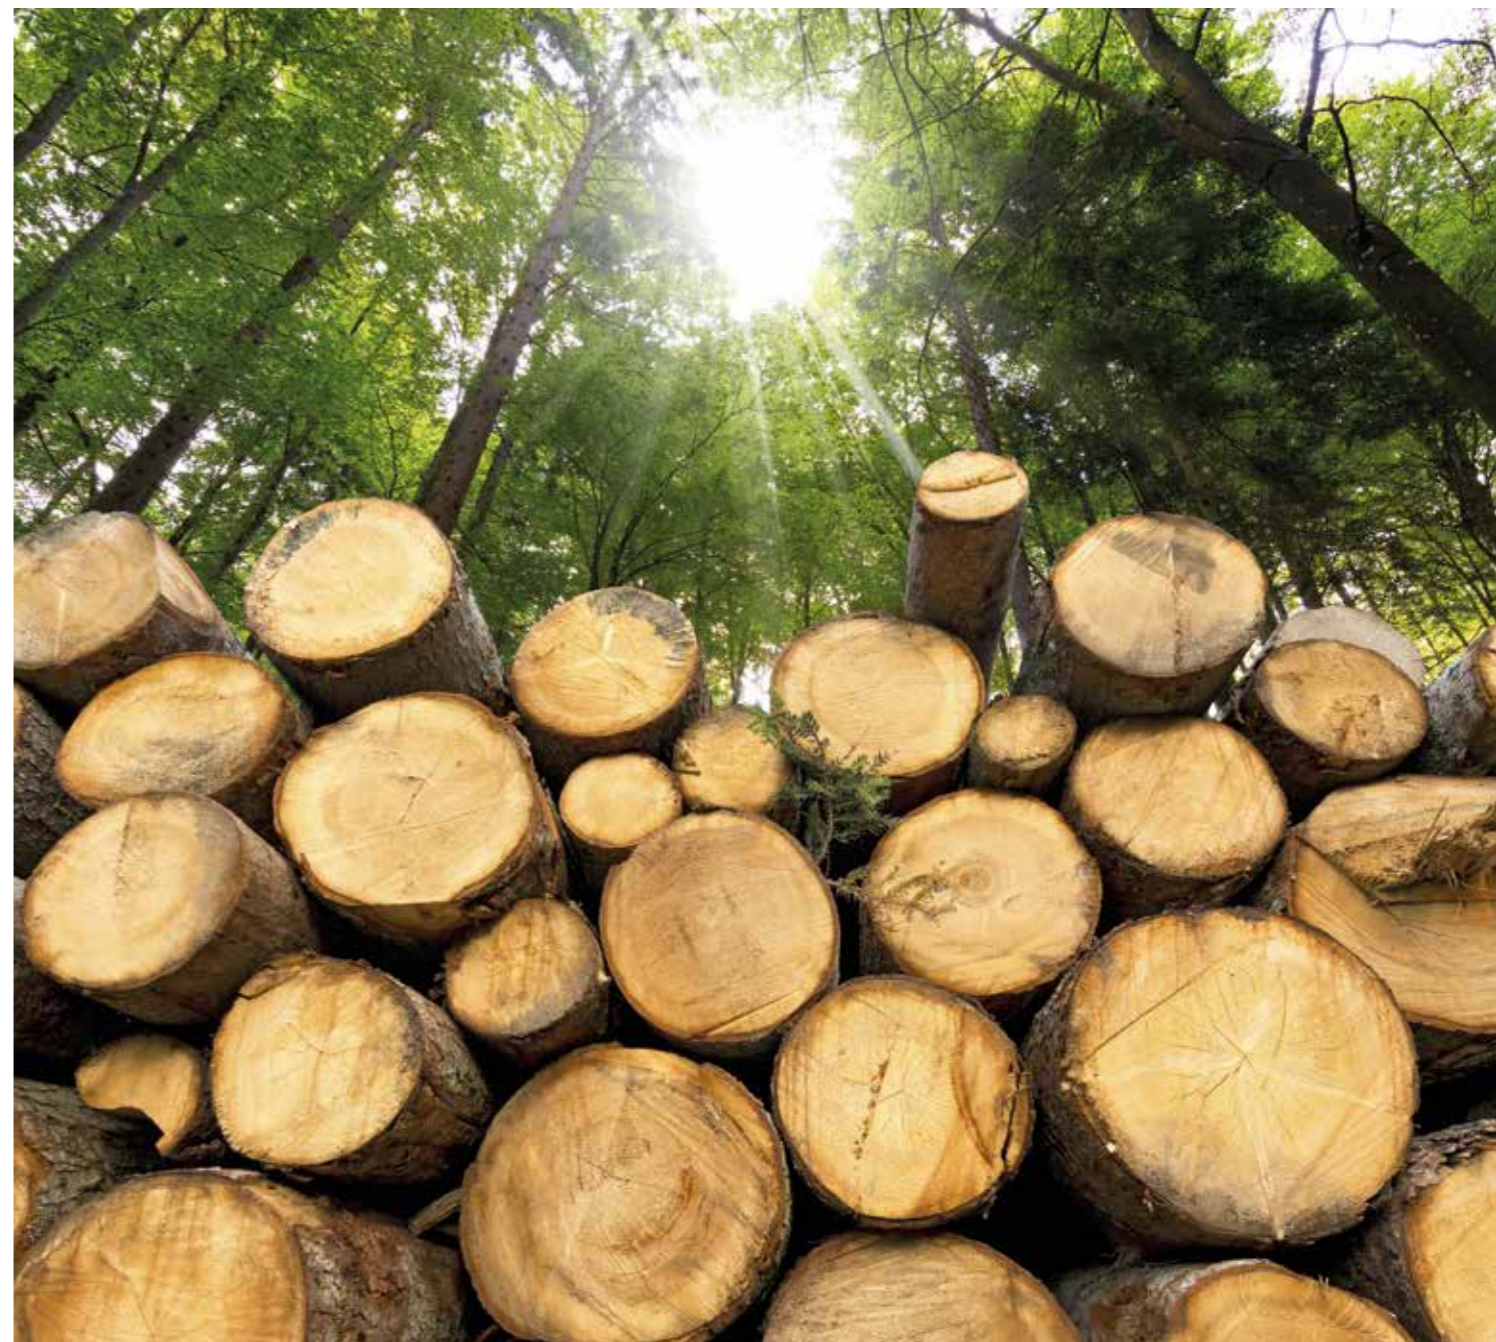

Grown in Britain Sawn in Britain Made in Britain Sold only in Britain

The majority of the timber we use is grown and felled from managed UK forests across Scotland. After felling, the timber is sawn and processed in our nearby sawmill and taken to our manufacturing operation in the heart of Britain.

It is here our skilled workforce proudly design and produce the widest range of garden buildings, fencing and structures available in the UK.

All of the products that we sell are dispatched from this site. Here, the final part of their journey is managed by our dedicated delivery department who are responsible for distribution to stores or direct to customers' homes by our fleet of vehicles.

Features & Structures

Adding a feature or structure is one of the simplest ways to transform your garden. They not only create vertical space for climbing plants but also offer a relaxing spot to unwind. Larger structures can serve as striking focal points, providing a framework to shape your outdoor space.

From arches and arbours to pavilions, pergolas, gazebos, and summerhouses, we offer a wide variety of sizes and styles to suit every garden. Each piece is designed to introduce a unique decorative touch while enhancing your garden's character. Whatever you choose, you can trust our products to bring both elegance and functionality to your space.

Getting Started with a New Build Garden

Staring at the 'blank canvas' of your new-build garden can feel overwhelming - where do you even start? It often seems so challenging that you might just decide to put it off for another day.

Right now, it's likely just a patch of lawn with a few plain concrete slabs, lacking colour, wildlife, and any inviting space to relax, enjoy the fresh air, or entertain friends and family.

The real challenge with a blank canvas is that it rarely comes with any inspiration. That's why we've put together an easy, low-budget idea to help you create an inviting outdoor dining area.

Create your own

Want to create your own entertaining area? Here's all you will need to add instant style to your garden.

Arbours

No matter the size or shape of your outdoor space, you can create a tranquil retreat to relax and unwind. Whether it's a cosy two-seater or a spacious corner arbour, our designs bring both character and extra seating to your garden. For a personal touch, why not get creative and add a splash of colour with a coat of paint?

Arches

Adding an arch to your garden is an effortless way to bring timeless charm and create a striking focal point. Perfect for supporting climbing flowers and plants, it encourages natural growth and enhances your garden's beauty. An arch is also a fantastic tool for dividing your space into distinct sections while adding height and depth to your planting.

Premium Radial Pergola

Combining a traditional build with strong modern lines, this sturdy corner pergola from Forest Garden creates an impressive focal point no matter your garden's style.

Train your climbing plants along the wooden pergola's rafters to create an attractive shady spot for relaxation or al fresco dining.

The 90-degree design makes the Radial Pergola particularly suited to a corner position. Purchase additional Radial Pergolas to create a semi-circle feature, a three-quarter circle, or even a dramatic circular pergola. Let the garden designer in you go wild.

Dining Pergola

DINING PERGOLA

DINPERG(HD)
249(h) x 304(w) x 244(d)cm

Our contemporary and elegant Dining Pergola has a stylish, modern design that will create a stunning feature in your garden. The laddered sides and roof panels are fantastic for training climbing plants and creating your own shade. What better setting for al fresco dining or drinks?

This beautiful structure also looks great paired with our sleeper furniture and is ideal for a patio or decked areas.

15 YEARS Anti-Rot Guarantee **5** DIY TIME

Ultima Pergolas

With two sizes to choose from, our Ultima Pergolas and Premium Ultima Pergolas are designed to make a statement feature in your garden. Grow a climbing plant across the top of the structure, such as Wisteria, to create a stunning scented walkway, or simply use as a statement piece under which you can relax or entertain.

Garden Bars

Transform your garden into a versatile entertainment hub with a Wooden Garden Bar. The backyard bar trend is here to stay, offering endless possibilities for customisation. Paint it, style it as a tiki or gin bar, add optics, or accessorize to reflect your unique personality and taste.

FOLD DOWN WALL GARDEN BAR

FDGBAR(HD)
 Closed - 100(h) x 77(w) x 14(d)cm
 Open - 181(h) x 77(w) x 108(d)cm

The Fold Down Wall Garden Bar from Forest means you can create an outdoor bar no matter how small your garden – even if it's a balcony! The shelving area allows you to store and display your drinks and glasses while the fold-down table creates an entertaining and drink serving area. Install at a height suitable for stools and the table is also an ideal eating space.

Garden bars are one of the biggest garden trends. Aurora research by Forest Garden suggests that 6 million* people in the UK are creating outdoor entertainment areas to be able to host friends and family at home.

Summerhouses

4Life Overlap Pressure Treated Summerhouses

Autumn House, Winter House, Spring House, Summerhouse.
A stylish and modern take on the traditional summerhouse, the NEW 4Life Overlap Summerhouses are a beautiful addition to any garden. Designed with large, long windows so the interiors are flooded with light and made with straight cut overlapping boards to aid water runoff and allow for natural movement, these modular summerhouses use more timber for a stronger build plus all panels are smaller, making it easier to transport, handle and construct.

Timber Gazebos

Whether you dream of a simple peaceful moment with a well-earned glass of wine and a good book, a leisurely meal outside with the family or hosting that amazing al fresco party, a hand built Timber Gazebo from Forest can turn your dreams into reality.

1 Choose your size

With a choice of 7 sizes, all our Gazebos are made from smooth-planed Radiata Pine and are Pressure Treated with a 15 year Anti-Rot guarantee.

Hexagonal Garden Gazebos
Available in 3m, 3.6m, 4m and 4.7m.

Premium Oval Gazebos
Available in 5.1m and 6m.

Square Gazebos
Available in 3.5m - with and without a base.

2 Choose your roof type

We offer a choice of roof type, each of which will give your Gazebo a different look and feel when finished. Our Country Thatch roofs, only available on the Hexagonal Gazebos, are lined with heavy duty, weatherproof canvas, whilst our New England Cedar and Traditional Timber roofs come with a waterproof Tricoya lining.

Traditional Timber

Country Thatch
Roof lining Available in 2 colours

Cosy Firepit Nights

Whether you're hosting an intimate gathering or a lively celebration, our firepit benches provide versatile seating options to suit any event. We've created two distinct garden setups to showcase their adaptability. Use a single bench for a cosy feel, pair two together, or arrange up to eight benches in a full circle for a communal gathering spot.

Enhance your outdoor space on cooler evenings by pairing these benches with a firepit for a warm, inviting atmosphere. With their modern, contemporary design, our benches bring a relaxed and welcoming touch to your garden, perfect for cosy nights spent creating unforgettable memories around the fire.

 Create your own

Reactive Mug - therange.co.uk

Oval Rattan Storage Basket - therange.co.uk

Topanga Firepit - therange.co.uk

Black Shaded Lantern - therange.co.uk

How to Customise Your Firepit Seating

STEP 1

Step 1: Measure and cut your sleepers
Begin by measuring your sleepers and cutting them to size. For our design, we used one 1.2m sleeper as is and cut the remaining two into lengths of 1m and 80cm. (See page 41 for sleeper options.)

STEP 2

Step 2: Position the sleepers
Stand the cut sleepers upright behind your curved benches, arranging them in your desired layout. We opted for a castellated design for added style and visual interest.

STEP 3

Step 3: Mark, drill, and fix
Mark the height of each bench onto the back of its corresponding sleeper. Pre-drill a hole through both the sleeper and the bench. Secure them together using a 15cm screw to ensure stability.

STEP 4

Step 4: Repeat and enjoy
Repeat steps 1-3 for all your benches, arranging them around your garden or firepit. Once everything is in place, step back, relax, and enjoy your cosy new seating area!

Grow Bag Tray Container

Tomatoes are Britain's most popular grow your own crop and are likely to be the first produce any proud new gardener will experience growing. Whilst unsightly grow bags sit within dull trays in full view, our new container creates both an attractive and functional feature for your patio. Easy to assemble, this container reduces the need to bend and kneel to plant and tend your crops.

1 Assemble the container

This product is quick and easy to put together.

2 Insert grow bag tray

The container is designed to fit a standard 100cm x 40cm tray.

3 Plant up

Add your grow bag and insert your plants – this is ideal for tomatoes.

4 Fix the cross bar

Provided to help stabilise your support canes, this bar runs the full width of the container.

5 Secure the support canes

To ensure your plants grow upward, use canes to help support them.

6 Watch your plants grow

Raised to an accessible height, you can easily tend to your growing plants.

Expert insight

The Grow Bag Tray Container also comes with a useful cross beam for tying your canes in order to keep them straight and upright.

Victorian Greenhouses

The golden era of the Victorian Glasshouse saw increasingly grand architectural buildings. Built to propagate and display plants from around the world, they were designed to maximise light and create the perfect temperature for the exotic varieties inside.

As the interest in all things botanical continued, buildings became simpler and those with smaller spaces could now cultivate plants and grow food for home consumption.

This evolution to lighter, functional, self-assembly glasshouses provided the inspiration for our range of Victorian Greenhouses today.

Victorian Tall Wall Greenhouse

A flexible and compact greenhouse with acrylic glazing. Ideal for gardens where space is at a premium. Includes two heights of shelving: middle staging can be dropped down to accommodate tall plants and a grow bag.

Georgian Tall Wall Greenhouse

Our Georgian Tall Wall Greenhouse is the perfect solution for smaller gardens or tight spaces. Its elegant, steeply pitched rooflines and distinguished looks from Georgian inspired design provide a perfect focal point for your outdoor area. The back panel means that you don't have to place it against a wall to keep your plants protected.

The tall and slender panes let in lots of light for your plants and an opening window with auto vent enables you to keep the temperature and air flow at an appropriate level. Removable shelving creates plenty of room for taller pots and allows plants to grow from the bottom to the top of the greenhouse, ideal for grow bags.

Mini Greenhouse

The Mini Greenhouse is the perfect planting solution if your garden space is at a premium and you don't have room for a full scale greenhouse. Using a greenhouse protects delicate plants from the harsh, cold weather and hardens them off before planting outside. Not only is this Mini Greenhouse superbly practical, it looks great too.

The front edge is lowered to encourage efficient rain water run-off and allow maximum light to enter the interior through the styrene glazing. It has excellent flexibility, with two independently opening lids that can be propped open and double doors – you can control air flow and temperature easily and only open the sections you need to access. Inside the greenhouse there are two shelves and the base is designed to fit a standard size grow bag.

Potting Shed

This garden building will help keep your garden clutter free and offers a secure space for you to store garden equipment. Far more than just a storage space, this potting shed has been carefully designed to maximise the elements that are prime for planting, seeding and potting.

With 10 fixed windows, it lets in extra light. Two opening windows help keep the temperature and air flow at an appropriate level. The design features smaller sections, making it easier to handle and to assemble.

- Supplied with two sets of two-tier modular plant staging that can be positioned in a row in front of the window or in the corner
- The windows are made from shatterproof PET glazing, which will not become yellow or brittle over time
- Modular in its design, it allows you to choose whether to hang the door to the left or the right of the window panel and which way it opens
- Built using interlocking Shiplap Tongue & Groove boards which make it robust and weather resistant
- Smooth-planed barge boards and felted roof give it an attractive finish

Composters

Home composting is the most environmentally friendly way of dealing with your garden waste, plus the compost it produces is an excellent soil improver. Our Slot Down Composting Bins allow you to simply remove individual side boards to reach your mature compost, whereas our Beehive Compost Bin features a trapdoor at the bottom providing easy access.

Fencing & Gates

On the fence? Here's how to choose.

Your fence frames your space. The height and style of fence you choose can have a big impact on the look, feel, and even the noise in your garden. That's why it's important to consider what you need your fence to do, and also what you're allowed to place on your property's boundary.

We have a wide range of panels that offer different combinations of privacy, security, aesthetic and noise reduction features. Once you've selected the panels that best suit your needs, you're able to add any fence posts that you need, as well as any accessories – choose from Gravel Boards, Post Caps and Fence Toppers or our Fencefast installation system – all of the items you need for your fencing project are available for Home Delivery with your panels.

Delivery

Forest's range of Fencing and Trellis is available for Home Delivery – subject to a minimum order of 3 panels.

5-step guide:

- 1 CHOOSE YOUR STYLE
- 2 CHOOSE YOUR TREATMENT
- 3 CHOOSE YOUR HEIGHT
- 4 SELECT A MATCHING GATE
- 5 SELECT POSTS & ACCESSORIES

Acoustic Ratings

The Decibel Noise Reduction Panel is rated with Forest's highest acoustic rating of 4, achieving a reduction in noise level of up to 30dB. We've also tested and applied acoustic ratings to some of our most popular panels.

Up to 30dB reduction. Up to 25dB reduction. Up to 20dB reduction. Up to 10dB reduction.

1 Traditional Larchlap Panels

SHOWN ON PAGE 72

Sturdy panels constructed with overlapping boards, sandwiched between a perimeter frame. Great value panels available in straight cut boards with a rustic finish. Provide privacy and are perfect for marking boundaries.

2 Tongue & Groove Panels

SHOWN ON PAGE 73

High specification panels, featuring thick section interlocking Tongue & Groove boards, sandwiched in a quality rebated frame. These strong, contemporary panels look great and offer a high level of security and privacy.

3 Closeboard Panels

SHOWN ON PAGE 74

The Closeboard Panel is a strong, sturdy and secure panel, perfect for privacy and security along garden boundaries. Finished with 8mm thick overlapping square boards arranged vertically and completed with a profiled panel cap to increase longevity. The strongest of our UK made panels.

4 Decibel Panel

SHOWN ON PAGE 76

Designed to help reduce unwanted noise in gardens by busy roads or with close neighbours. Using thick interlocking Tongue & Groove boards, the panel combines noise reduction performance with great looks.

5 Contemporary Panels

SHOWN ON PAGE 78

A range of stylish and modern panels made from sturdy horizontal slats. Ideal for use along boundaries or as a garden partition. Includes a range of 6ft pre-painted grey panels to transform your garden giving it a strong contemporary look.

6 Decorative Panels & Screens

SHOWN ON PAGE 80

Our collection of decorative panels have a high quality, smooth-planed finish and come in a variety of styles - available with curved, straight or trellis tops. Our screens are designed as a decorative feature and can let in light to give a more open feel to your garden.

7 Low Level Fencing

SHOWN ON PAGE 84

A traditional style of palisade fencing that offers an unobtrusive partitioning solution. Ideal for marking boundaries, these panels will create a decorative addition to your garden.

8 Gates

SHOWN ON PAGE 86

Gates come in a variety of different styles and constructions, Designed to complement our fence panels, they look great when combined with a matching panel run or are perfect when used alone as a side gate.

The Larchlap Range

Panels we've been proud of for 50 years

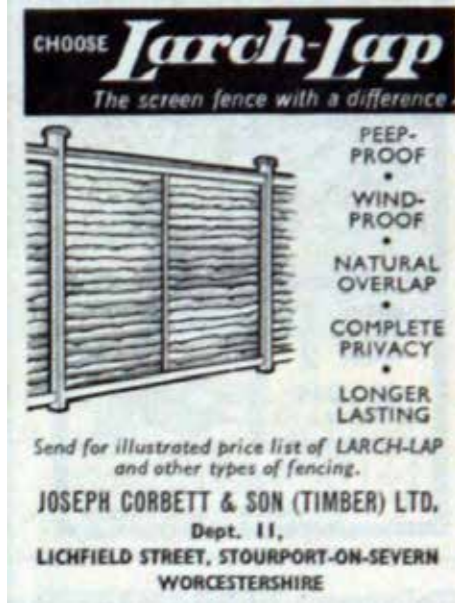

Image courtesy of Grace's Guide to British Industrial History.

Larchlap Panels

We believe that creating a space you're proud of starts with a product we're proud of. And our Larchlap collection is no exception. Timber for the entire range is grown and felled in UK forests, processed in our UK sawmill and the fence panels are assembled by our skilled workforce at our factory in rural Worcestershire.

The traditional British Larchlap panel has stood the test of time for over 50 years, originally designed by Joseph Corbett & Son in Worcestershire, the company and famous Larchlap panel proudly became part of Forest Garden.

Domestic fencing with a difference

Whether you view your garden as a peaceful place, or a private space, the award winning Decibel Noise Reduction Panel will help reduce unwanted sounds making it feel calmer all round.

The panel combines noise reduction performance with great looks. Thick (17mm) interlocking Tongue & Groove boards are smooth-planed and mounted in a 45mm thick rebated frame to ensure there are no gaps for the noise to pass through.

Acoustic Ratings

The Decibel Noise Reduction Panel is rated with Forest's highest acoustic rating of 4, achieving a reduction in noise level of up to 30dB. We've also tested and applied acoustic ratings to some of our most popular panels.

Up to 30dB reduction.

Up to 25dB reduction.

Up to 20dB reduction.

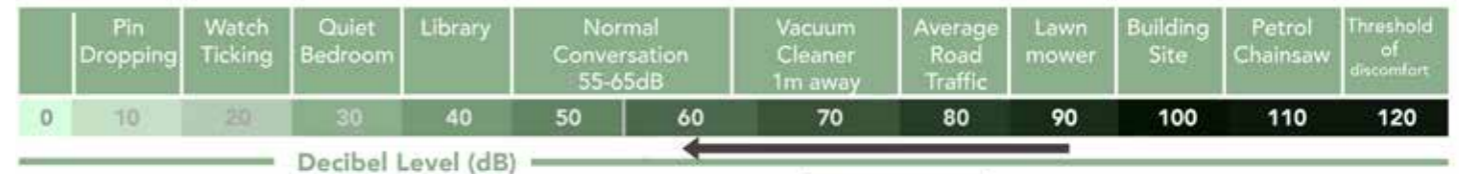

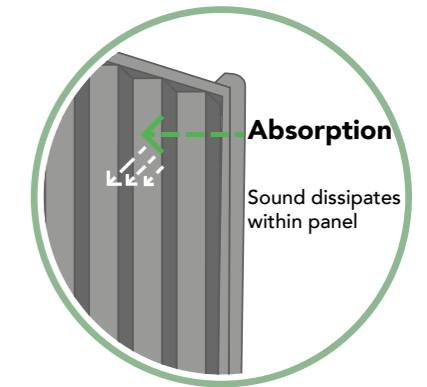

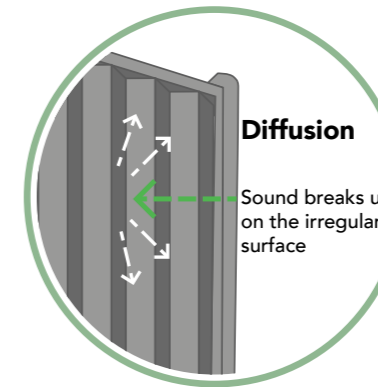

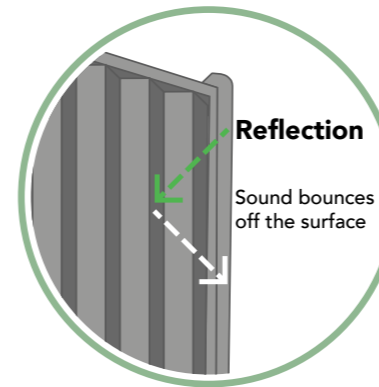

Up to 10dB reduction.

Independently laboratory tested to BS EN ISO 10140-2:2010 in accordance with BS EN 1793-2 and BS EN ISO 717-1, achieving a reduction between 25dB and 34dB. For acoustic rating details see page 143.

Triform Technology from Forest Garden

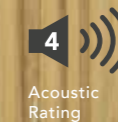

The boards on The Decibel Noise Reduction Panel feature a specially developed triangulated profile. This creates multiple angles over the face of the board which scatter noise waves, reducing their intensity. The Decibel Noise Reduction Panel will look great in any garden and is perfect for houses with close neighbours or for gardens near busy roads.

Low Level Fencing

Low level fencing is ideal when you need screening but where full height fence panels aren't suitable, it can make a really decorative addition to your garden. It's perfect for marking boundaries and can really add to the kerb appeal of your property when used at the front, or it can be used for sectioning off parts of a back garden.

UNI80	240(h) x 6(w) x 6(d)cm

Expert insight

There are many ways to erect a timber fence. Whichever method is chosen, you can guarantee success if you follow some basic rules.

- Non Pressure Treated fence panels should always be erected on Pressure Treated gravel boards
- Use suitable posts. Heavier fence panels will benefit from the added strength of 10cm posts
- Check your post length before fixing. If erecting over uneven ground you may require longer posts
- Use Fencefast Easy-Fit products to make replacing a damaged post quicker and easier

SEE OUR SHED AND GROUND PREPARATION VIDEOS AT FORESTGARDEN.CO.UK

Fencefast

Fencefast ground spikes consist of a long steel spike with a square clamp at the top which holds the post. The spike is driven into the ground using a driving tool and a sledgehammer.

Fencefast ground spikes offer an alternative to digging a hole and setting posts in concrete. They can be used for posts for fence runs or for anchoring other garden structures such as arches and pergolas.

How to install Fencefast

1 Installation of the spike will be easier if a pilot hole is made before driving the spike into the ground. If available, use a steel rod or similar and drive a straight hole in the desired location around 20 – 30 cm deep.

2 Push the tip of the Fencefast spike into the pilot hole and insert the driving tool* into the clamp of the Fencefast unit. Using a spirit level, ensure the Fencefast assembly is straight (vertical).

3 Begin driving the spike into the ground using a sledgehammer**. Use small blows at first.

4 Regularly check that the unit is straight using a spirit level on adjacent sides of the clamp.

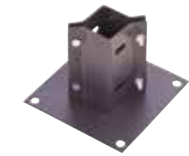

5 Once the spike is fully in the ground, with the base of the clamp level with the ground, insert the post into the clamp and tighten the bolts.

EASY-FIT FENCEBASE

Fence post support for use on surfaces which can be drilled to accept expansion bolts, such as decking, slabs and concrete.

FBEF65(HD)
65-80mm post size

EURO U-BRACKET

For use with Forest Europa fence range (40mm frame width). Used to mount fence panels to timber posts. Screw to post, slot panel in then screw through bracket into panel.

FXEU(HD)

FENCEFAST DRIVING TOOLS

Used for driving Fencefast spikes into ground. Slots into Fencefast clamp, providing a solid surface to impact with sledgehammer in order to drive spike into ground.

DD02EF(HD)
45-65mm post size

DD04EF(HD)
90mm post size

FENCEFIX U-BRACKETS

Used to mount fence panels to timber posts. Screw to post, slot panel in then screw through bracket into panel. For panels with frame width up to 50mm.

FXU25(HD)

EASY-FIT FENCEFAST

Post holder for mounting timber posts into soil. Spike drives into ground providing clamp for securing post into.

FEF4545(HD)
45-60mm post size
450mm spike length

FEF6560(HD)
65-80mm post size
600mm spike length

FEF6575(HD)
65-80mm post size
750mm spike length

FEF9075(HD)
85-105mm post size
750mm spike length

FENCEFAST EASY-FIT CONCRETE IN

Post holder for setting into concrete. Set stem into concrete and use clamp to secure post into.

FEFC65(HD)
65-80mm post size

FEFC90(HD)
90-105mm post size

EASY-FIT REPAIRFAST 65MM

Repair solution for timber posts originally mounted in concrete that have rotted or broken. Remove old post to ground level then drive spike into post and hole in concrete.

FEFR65(HD)
65-80mm post size

FENCEFAST POST GRIP

Post holder for mounting timber posts into soil. Spike drives into ground. Post wedges into housing at top of spike.

WGFS6080(HD)
73-78mm post size
600mm spike length

Expert insight

Check location of all underground services (electricity, water, drains) before using Fencefast spikes.

*Two sizes of Fencefast driving tool are available. The smaller DD02EF driving tool is for use with the smaller FEF4545. The larger DD04EF driving tool is for use with the FEF6560, FEF6575 and FEF9075 Fencefast spikes.

**Ensure that the sledgehammer is only used to impact the driving tool – the Fencefast unit must not be impacted directly.

Sheds & Workshops

5-step guide to choosing your shed.

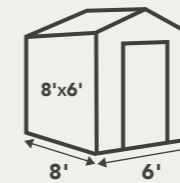

Deciding which shed is right can be tricky, so we've made the process as simple as possible with our 5-step guide.

1 Choose your size

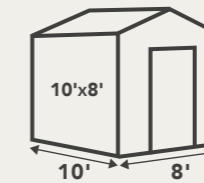

Whether you're after something compact for tools or something spacious for larger equipment, our shed range offers a practical solution whatever size of space you have.

Small and compact shed perfect for neatly storing garden tools.

Mid-size shed suitable for large equipment like lawnmowers and bikes.

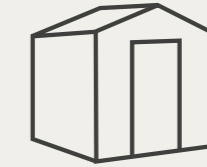

Large, spacious shed ideal for storage or as a functional workshop.

All of our shed descriptions are quoted with the longest length first.

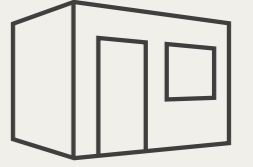

2 Choose your style

We offer 3 styles of shed:

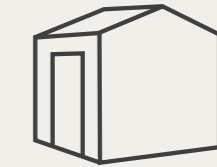

APEX

PENT

REVERSE APEX

Give yourself some shed space

At Forest, we are the shed experts, boasting over 50 years in the business and having produced over 2 million sheds! With an extensive range of nearly 200 sheds, there is a perfect shed for everyone from small storage units to large workshops. No matter the size of your outdoor space, we've got you covered.

Forest Shed Range Comparison

THE 4LIFE SHED™
~ 25 year guarantee ~

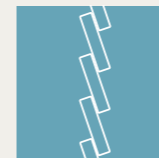

BECKWOOD
Weather Beating Performance

Timberdale
by forest

Specification	THE 4LIFE SHED™	BECKWOOD	Timberdale
Cladding Type	Overlap	Shiplap Tongue and Groove	Premium Tongue and Groove
Cladding Thickness	7mm / 0.28 inch	12mm / 0.47 inch

Locking System	Plate Hasp & Staple	Sturdy Pad Bolt	Secure Rim Lock
Opening Windows	N/A		2 Opening Windows
Framing Size	28 x 28mm		33 x 33mm
Roof Covering	Green Mineral Felt		Premium Poly Felt
Roof Material	OSB (Oriented Strand Board)		Tongue & Groove Boards
Roof Thickness	8mm / 0.31 inch		12mm / 0.47 inch
Floor Material	Strong, Interlocking Tongue & Groove Boards		
Pressure Treated	✓	✓	✓
25 YEARS Anti-Rot Guarantee	✓	✓	✓

3 Choose your construction

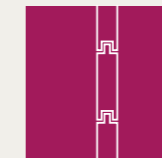

We offer 3 styles of cladding:

OVERLAP
Rough-sawn boards overlap to ensure water run-off.

SHIPLAP TONGUE & GROOVE
Interlocking Tongue & Groove boards with a shiplap profile for water run-off.

TONGUE & GROOVE
Tight-fitting Tongue & Groove boards for wind and rain protection.

4 Prepare your base

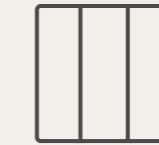

We recommend you prepare your base before installation in 1 of 3 ways:

CONCRETE SLABS
Slabs neatly laid with minimal gaps on a dressing of sharp sand and hardcore.

CONCRETE
Solid concrete base will minimise movement of sub-soil ensuring longevity.

SHED BASE
A timber frame.

5 Choose your delivery day

White Glove
Delivery by forest

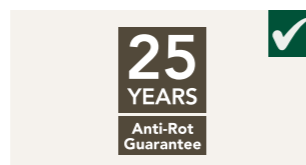

- You choose a convenient day for delivery
- You will receive a 4 hour time slot, 2 days before delivery
- You will receive a 2 hour ETA on the morning of the delivery with a link to track the driver
- Our own friendly drivers will deliver the product straight into your garden
- We will remove all your packaging

You'll only ever need one shed with a 4Life Shed™

- ✓ **25 Year Life Anti-Rot Guarantee** as standard.

Forest Retreat Sheds

Whether you want a space to store your tools, pot your seedlings or a haven to do a bit of DIY, Forest Retreat Sheds give you an exceptionally high quality workspace – a practical space to escape to as well as making a beautiful feature in your garden.

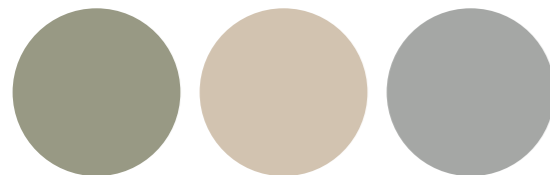

Your Garden Retreat

Hand made to order from the finest materials, 50 years of experience and expertise come together in our Forest Retreat Sheds, representing the very best of our range.

Made from smooth-planed redwood lap boards and a substantial framework, these buildings are built to last. The steep pitch roof offers extra headroom and the Canadian Red Cedar Shingles give the roof a beautiful, high-end finish.

With a choice of 3 colours chosen to complement the natural habitat, this shed is guaranteed to make a grand statement in any size of garden.

- Highest quality kiln dried, smooth-planed Redwood lap boards
- 20mm wall thickness at point of board overlap
- Opening windows, glazed with 4mm toughened glass
- Pressure Treated interlocking Tongue & Groove boarded floor and roof
- Canadian Red Cedar Shingle roof
- Delivery and installation on site is included in the price
- A choice of 3 factory finished paint colours

Forest Pent Retreat Sheds

Whether you want a space to store your tools, pot your seedlings or a haven to do a bit of DIY, the stunning new 8x6 Forest Pent Retreat Shed gives you an exceptionally high quality workspace. More than just a utility building, it provides a practical space as well as making a beautiful feature in your garden.

The pent roof offers plenty of head room inside. Shelves can be readily inserted at the back of the shed, making full use of the roof space as a place for storage. The floor and roof use interlocking, smooth-planed and pressure treated, Tongue and Groove boards and the floor is mounted on pressure treated bearers to protect it from ground contact. The roof is finished with high quality Canadian Red Cedar Shingles that overtime will develop to a subtle grey. Two opening windows are glazed with 4mm toughened glass.

With a choice of 3 colours chosen to complement the natural habitat, this beautiful shed is guaranteed to make a grand statement in any size of garden.

Small Storage

Our Garden Stores come in a wide variety of sizes and are ideal for making sure possessions are kept tidy and put away – keeping your garden neat and clutter free. Maybe you need to store a couple of bikes, or perhaps want somewhere secure for garden tools or a lawnmower. Even if it's just a place to keep the bins concealed, or the kids' toys, there's something for you.

XTEND BY FOREST GARDEN BUILDINGS

PEACE OF MIND AFFORDABILITY

Space is at a premium in most homes and extensions are costly. An Xtend garden building is constructed from high quality, energy efficient materials and is underwritten with a 15 year structural guarantee. You can be confident with Xtend that quality has not been compromised over price.

EASE OF CONSTRUCTION

Xtend is a clever choice for your garden building as it comes delivered in pre-cut modular SIPs panels ready for assembly. Some of the best designed new homes are now made this way, so why not your new garden building? A step-by-step guide means the build is incredibly straightforward.

YEAR ROUND ENERGY EFFICIENT

Keeping you warm in winter and cool in summer, Xtend delivers real energy efficiency. Double glazed windows, highly efficient insulated walls, roof and floor combine to drive down energy costs. It's a fact that Xtend garden buildings can be as energy efficient as a new-build home – with an EPC energy rating of B.

Balance your work life in your garden

Achieve your work/life balance with the premium Xtend range of garden buildings from Forest Garden. These new buildings have everything you could wish for in a home office - contemporary looks, real energy efficiency, ease of construction and keen pricing.

AESTHETICALLY PLEASING

It only takes a glance, to see that an Xtend building has the pleasing lines and contemporary design to catch the most discerning eye, Xtend is at home in any garden, be it traditional or modern, that is how great design is meant to be.

STRUCTURAL INSULATED PANELS (SIPs)

- Total wall thickness including SIPs panels, internal and external cladding and cavities is 177mm
- Roof is 11mm OSB + 100mm insulation + 11mm OSB = 122mm total
- 97mm thick insulated walls consist of 75mm of polystyrene insulation sandwiched by two sheets of oriented strand board (OSB)

The core structure of an Xtend building is made from SIPs panels - high performance material for building construction. The 21st century way to build.

EXTERNAL CLADDING

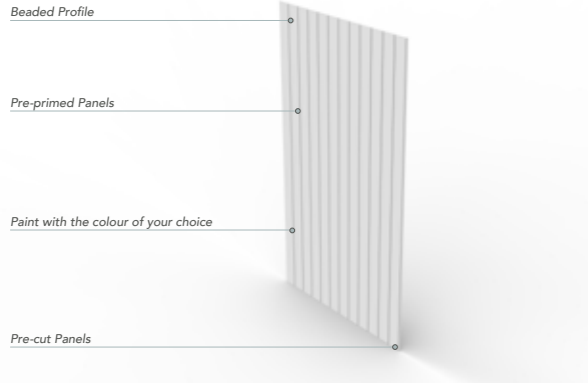

- No measuring and cutting every single batten and board to size before mounting
- Cladding panels are simply positioned on the building and screwed into place
- Panels are made with 15mm thick premium interlocking tongue and groove boards mounted to framing battens

Pre-cut external timber cladding panels for quick and easy assembly.

INTERNAL CLADDING

- Wall panels are mounted to 28mm thick battens creating a cavity perfect for routing electrical wiring
- Roof battens are 45mm thick to allow for recess roof lights to framing battens

Pre-cut interior MDF panels for quick and easy assembly for walls and ceiling.

WINDOWS & DOORS

Window material uPVC 5 chamber
Window colour Anthracite grey externally with grained finish Smooth white internally
Window locking Two double clasp, mushroom headed espagnolettes

Door material uPVC reinforced 5 chamber
Door colour Anthracite grey externally with grained finish Smooth white internally
Door locking 7 point multi-lock with ultion three star security barrel
Glazing 28mm, A rated, double glazed, safety glass

ROOF COVERING

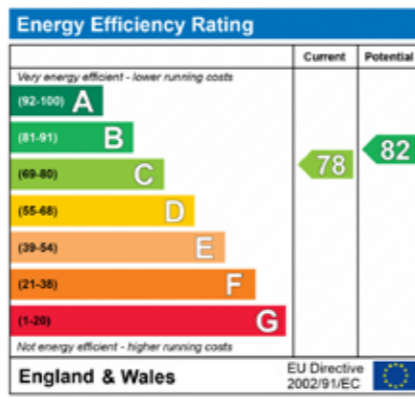

- Does not crack, split or rot and does not support moss or algae growth
- UV stable & environmentally friendly
- Safe and easy to install with one piece sheet which means no joints and no leaks
- 50 years roof life expectancy
- Anthracite grey fascias included

External roof covering is made from 1.2mm thick EPDM black rubber which creates a maintenance free waterproof membrane.

ENERGY EFFICIENCY

- Double glazed windows
- Warm in Winter, cool in Summer
- Energy efficiency model rating of 78 (category C)*
- Potential to increase to 82 (category B) with the addition of a photovoltaic solar panel

Highly efficient insulated walls roof and floor
 * based on lighting from 3 x 4 watt LED bulbs and heat from a high efficiency wall mounted heat pump.

Log Cabins

Manufactured from kiln-dried timber, a Forest Log Cabin is the natural choice to create that extra outdoor living space. These traditional timber buildings will look great in any garden environment as well as giving you the space and freedom to enjoy the things you love.

▶ SEE OUR LOG CABIN VIDEOS AT FORESTGARDEN.CO.UK

24KG POLYESTER FELT
An excellent value felt with a life expectancy of 15 years. Uses a weave of fibres giving it twice the tear resistance of mineral felt. Can be used as a single layer but increased performance is achieved by installing over an underlay felt.

34KG POLYESTER FELT
A higher grade version of the 24kg weight felt, with a thicker bitumen waterproof layer. This gives it even greater tear resistance and a life expectancy of 20 – 30 years. It is installed over an under-layer of breathable membrane.

FELT SHINGLES
An alternative to the Polyester Felt on Apex Roofed Log Cabins. Used in conjunction with a breathable membrane underlay, the shingles offer a different aesthetic to plain felt, giving a 'tiled' effect. Life expectancy of the Felt Shingles is 10 years.

Entertain and maintain

We know you'll be keen to start entertaining and using the space straightaway, but we strongly advise applying a solvent-based preservative treatment inside and outside soon after assembly. As the UK has a very wet climate it is important to ensure that the timbers remain dry and protected until such time as a treatment is applied.

Whilst the timber we use will change colour over time, simply re-apply a colour-based timber treatment regularly to maintain the look. Timber is a natural material which will shrink and expand due to moisture content within wood and the changing weather conditions. Any extreme changes should revert back over time.

PRECISION ENGINEERED

Our precision-engineered logs are manufactured with chalet-cut corners and a 6-sided joint to reinforce stability against the UK's wind and rain.

SUSTAINABLE TIMBER

The timber we use is slow grown Nordic Spruce, clear from the tight growth rings on the logs. It's also FSC® certified to ensure the sustainability and longevity of supply.

Expert insight

Visit our website to view videos on how to prepare a base and step by step guides to building your cabin.

DOORS & WINDOWS

All models come with adjustable door hinges and mortise lock mechanisms as standard, with opening windows available on most. Check specific models for details.

The doors on all Forest Log Cabins all have fixed windows. While some models are single glazed or have the option of single or double glazing, most are double glazed. All glass is toughened for safety and opening windows feature tilt & turn opening mechanisms.

ROOFS AND FLOORS

The roofs and floors in all our cabins are constructed from kiln-dried Tongue & Groove boards. Different roof felt options are available. We recommend the roof options that include underlay.

AVAILABLE THICKNESSES

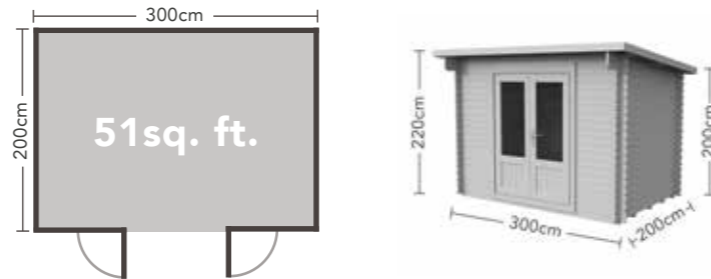

Our Log Cabin range is available in three log thicknesses.

Care & Attention

Here at Forest, we put a lot of care and attention into the manufacture of our products. From selecting just the right type of wood, to our flexible delivery and assembly service options, we take pride in ensuring that everything is just so.

Therefore, to help you get the most out of our products, here are a few things you should know...

Wood is a natural product and susceptible to changes in the environment, any extreme weather conditions will cause a reaction in timber used outdoors. The nature of wood means that it can vary in colour in different areas of the same product. Rest assured that this colour difference will balance out over time. Heat may cause panels to lose shape but this will be reversed once the temperature subsides. Posts and uprights may split but again this is natural and will not affect the structure of your product.

All timber will take time to settle in its outside surroundings. In the winter months the wood will swell due to moist air whereas in the summer the wood may shrink. Movement and gaps in the wood are normal, particularly with overlap constructions.

Some pressure and dip treatment colour may leach out over time. This may cause discolouration to surfaces the product may sit on such as painted walls, decking and paved areas.

Timber treatment

Forest products are guaranteed against rot through either pressure treatment or dip treatment*.

Pressure treated timber

Forest pressure treated items which are designed to be in ground contact are impregnated with preservative, an effective method used to protect wood against fungal decay and insect attack, saving time and money on retreating. The treatment is based on the well-established effectiveness of copper combined with a co-biocide.

15 YEARS
Anti-Rot Guarantee
PRESSURE TREATED
Penetrative treatment for 15 year Anti-Rot protection.

25 YEARS
Anti-Rot Guarantee
PRESSURE TREATED
Penetrative treatment for 25 year Anti-Rot protection. 4Life, Beckwood and Timberdale products.

If the treated timber is cut, notched or drilled, it is recommended that an effective cut end treatment be applied. Failure to do so may reduce effectiveness of the Pressure Treatment.

Stains, paint and water repellent may be applied after purchase providing you follow the manufacturer's instructions.

Dip treated timber

Dip treated products should be isolated from the ground with a Pressure Treated gravel board or similar base and be retreated yearly to comply with the conditions of the guarantee.

10 YEARS
Anti-Rot Guarantee
DIP TREATED
Surface treatment for 10 year short-term, Anti-Rot protection.

To change the colour of the timber, allow the product to mature before applying a suitable brand of stain/paint.

Some other things you should know

Stockists: We have a great network of stockists across the UK and online, for a full list please visit www.forestgarden.co.uk

Pricing: Please refer to our website for current Suggested Retail Prices that are inclusive of the prevailing VAT rate.

Delivery: The majority of Forest products come flat packed and will require assembly (unless stated). On some products pre-drilling may be required. Estimated DIY times are indicated in hours. Products available for Home Delivery are marked with (HD) following the product code. Products available for Home Delivery and Assembly are detailed with an (INST) or (IN) code. Please note, for installed items (with the exception of Vale Greenhouses and Retreat Sheds) delivery and installation will be on separate days.

Home Delivery is unable to be offered for the following postcodes, BT1-BT99, GY1-GY9, HS1-HS9, IM1-IM9, IV41-IV56, JE1-JE5, KA27-KA28, KW15-KW17, PO30-PO41, PO49, TR21-TR25. Whilst we aim to deliver within 5 working days there will be some instances when it will take longer, including Scotland, hard to reach locations or when items are out of stock. Please note Xtend Buildings, Log Cabins, Round Timber Gazebos, Retreat Sheds and Vale Greenhouses are special orders and have longer delivery times detailed. Refer to forestgarden.co.uk for latest lead times.

Sustainable Timber: We are proud as a business to hold two timber certifications, FSC® and PEFC®, that are regularly audited internally and independently. We are currently working towards net zero 2050. Please see our website for the most up to date information.

Ongoing care

Please see forestgarden.co.uk/guide-to-our-products/ for full details.

Wood colouration

Pressure Treated wood colouration varies depending on timber species and length of time from treatment. The colour will fade over time to a silver/brown.

Dip Treated product colour is not permanent and to retain factory finish treatment should be applied regularly.

Cedar shingles used on the roof of our Round Timber Gazebos and Forest Retreat Sheds will fade over time to a silvery, grey colour.

Where to site your product

The base for any product should be firm and level; ideally air should be able to circulate under the base. Wooden buildings must not be sited directly on soil or grass. Our sheds are all provided with bearers to allow air flow under the shed. See forestgarden.co.uk for our base preparation guides.

Any questions?

For more information visit forestgarden.co.uk/help-support, call our technical department on 0333 321 3142 or talk to us via live chat on our website.

Specifications: All specifications detailed are correct at the time of going to print, overall sizes quoted are approximate. We reserve the right to alter the specifications of our products at any time. All Forest products (unless stated) are supplied unpainted.

Acoustic Rating System:

- **Rating 4** equates to 8-fold noise reduction or up to 30 decibels.
- **Rating 3** equates to 6-fold noise reduction or up to 25 decibels.
- **Rating 2** equates to 4-fold noise reduction or up to 20 decibels.
- **Rating 1** equates to halving noise reduction or up to 10 decibels.

Independently laboratory tested to BS EN ISO 10140-2:2010 in accordance with BS EN 1793-2 and BS EN ISO 717-1, achieving a reduction between 25dB and 34dB.

Guarantees: Please retain receipt as proof of purchase. Please see website for full conditions of Forest guarantees - www.forestgarden.co.uk/help-support

Forest painted timber products (excluding Forest Retreat Sheds) are pre-treated with an aqueous industrial wood preservative prior to painting. To maintain the paint finish, it is recommended that the products are repainted after 3 years.

*Log Cabins are supplied untreated.
