INNOLINE®

INNOLINE® is designed for sheds and other outdoor auxiliary buildings. Featuring advanced Compact Core Technology and an attractive tile-style finish, it combines durable performance with a modern look — all backed by a 20-year warranty.

COMPACT CORE TECHNOLOGY

Our new manufacturing process tightly compresses high-quality fibres to create a dense, uniform core structure.

The result?

A roofing sheet even lighter, more rigid and built to last. The compact core improves rigidity and maintains performance over time.

Easy to transport and install, it is designed for single-person installation with no cutting required.

TECHNICAL CHARACTERISTICS

LENGTH	94 cm
WIDTH	80 cm
WEIGHT OF PRODUCT	2 kg

*Tolerances: Length [-0.2;+1 %], Width [±1 %], Weight of product [±0.15 kg]

INSTALLATION IN FEW AND EASY STEPS

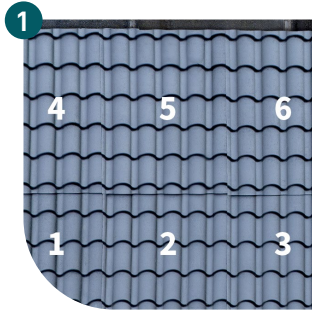

GET READY AND POSITION THE SHEETS

Prepare a drill and a tape measure.

A standard saw is optional.

Make sure the roof is a continuous full deck and free of battens.

Position all sheets without fixing them.

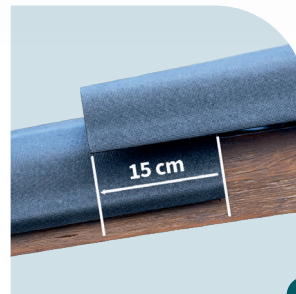

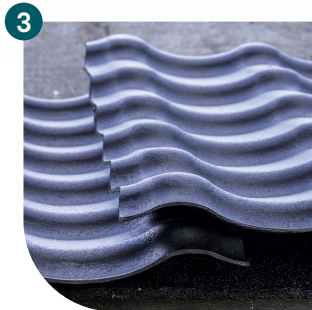

PERFECT THE EDGES

When positioning the sheets, start at the bottom, lining up the edges, and leave a 2 cm overhang.

FIX THE SHEETS

Fix the sheets at the crest of each corrugation using ONDULINE® SCREWS. Overlap adjacent sheets, vertically and horizontally, by at least one corrugation before fixing the last section of each sheet. Increase the overlap to avoid cutting sheets.

Plan 10 fixings per sheet.

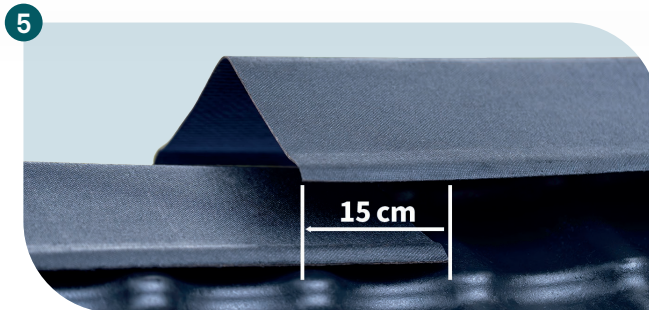

VERGE

Fix verge trims on the side first then, on the sheets.

Overlap each trim by 15 cm, with the wider side facing up.

Align the verge screws with the screws on the sheets.

RIDGE

Finish with the ridge cap, overlapping each section by 15 cm.

Screw it down at the crest of each corrugation.

**Now,
you can sit back
and chill.**

TIP

Add a decorative wooden piece at the ends of the ridge cap for a professional finish. Easily craft it yourself using any leftover piece of wood.
